I would like to respectfully request that you reject the petition presently being considered by the FCC from the National Association of Broadcasters (NAB petition 04-160). I am a subscriber to XM radio services and drive over-the-road truck for a living. I feel that any attempt to pass laws detracting from XM's ability to keep the traveling public informed on local weather and traffic should be thwarted. For my safety, my family's safety and the safety of all traveling public XM radio provides an unequalled service. The very fact that I can listen to one or two XM radio channels for pertinent information without static or seemingly endless commercials or without constant searching in unfamiliar areas for this information helps keep my mind on my driving. In bad weather or road conditions I can provide myself with the finest information available and make an educated decision as to whether i should re-route, slow down or even pull into a safe haven for rest until the situation becomes safer. I do pay for these services and feel that as a free American I do have the right to listen to what I desire. No person or group should be allowed to pass laws against my safety.
